

# Quicker

**BE PREPARED!**

[WWW.QUICKERBIKEPUMPS.COM](http://WWW.QUICKERBIKEPUMPS.COM)

Minimum size – Maximum power!  
The best pump you can find!

## QUICKER PRO Art.nr 116660010

Quicker Pro uses a patented technique called Multi Chamber Double Action. Contrary to all other hand pumps on the market, Quicker Pro produces a constant airflow. It generates the same air-volume per stroke regardless of what pressure you have in the tyre! So if you for example pump from 2-3 bars or from 9-10 bars the number of strokes will be the same!

The pressure can be read at the integrated pressure gauge, which is cleverly placed in the front cylinder of the pump.

Quicker Pro features a valve lock that fixes the pump to the valve and prevents leakage. The valve/nipple seal can easily be unscrewed and in order to change the valve just turn the inner parts.

An important factor in pumping, is how much force you need!

The force used when inflating with Quicker Pro is at 7 bars only 5 kilos/11 lb. A conventional pump requires 17-20 kilos /37-44 lb.!

Mounting clip(s) included.

### FACTS

Material: Alu/Polyacetal.  
Length: 180 mm  
Diameter: 34 mm  
Weight: 160 grams  
Capacity: 105 cm<sup>3</sup>/stroke  
Maximum pressure: Guaranteed to 12 bars/154 PSI

X-treme Volume for X-treme bikers!

## QUICKER XTREME Art.nr 115780010

If you are looking for a really fast pump with much volume, but not necessarily super high pressure, this is the pump to buy!

The MTB-bikers will be pleased using the Quicker X-treme.

In comparison Quicker X-treme is more than double as fast as a modern telescopic pump!

The valve lock securely attaches the pump onto the valve and prevents air from leaking out. Use full strokes in order to get maximum power out of this incredibly fast double action pump.

Quicker X-Treme is manufactured with a strong, solid body in aluminium and

a polyacetal plastic handle that not only looks cool, but also gives you the perfect grip.

When purchased the valve position is for Schrader/car valve. In order to change to the other valves, simply take out the two inner parts inside the head and reverse them.

### FACTS

Material: Alu/Polyacetal.  
Length: 230 mm  
Diameter: 34 mm  
Weight: 180 grams  
Capacity: 125 cm<sup>3</sup>/stroke

## QUICKER CO2 Art.nr 116660045

Quicker CO2 is a small, explosive and durable inflator.

A 16 gram CO2 cartridge fills 1 25" MTB tire to 40 psi/2,8bar or a 27"/700c Road tire to 126psi/9bar.

The CO2 Inflator has a lock system to prevent undesired flow. You can control the flow by a trigger.

Dual head works for all valves. Just push the yellow dot to desired opening.

Rubber protection to prevent dust for coming into the head.

Comes with fastening clips.

### FACTS

Length: 150 mm

Weight (without cartridge) 100 gram

The classic multiple Quicker!

## QUICKER MICRO Art.nr 108700100

Quicker Micro was the first double action pump ever produced for bicycles and balls!

Many families with children like this pump, because there is usually a number of different types of bikes in the garage, as well as footballs, basketballs and more that's need to be inflated on a regular basis.

Quicker Micro is easy to use, durable and inexpensive! It is so small and handy that it can easily be stored in the pocket of your trousers or for example in the saddle bag when you are biking.

There is a pair of clips included, which can be used to attach the pump onto the frame. It comes with adaptors for all tyrevalves and as well as a ballneedle.

### FACTS

Length: 200 mm

Diameter: 28 mm

Weight: 58 grams

Capacity: 85 cm<sup>3</sup>/stroke

Maximum pressure: 4 bars/56 PSI

Small, lightweight and inexpensive!

## QUICKER BIKE Art.nr 115770106

If you are looking to reduce your total carry on weight, but still want to have a good pump, Quicker Bike is the perfect choice!

The Double Action in this pump is of good quality. To pump 3 bars with the inexpensive Quicker Bike, is comparable with modern telescopic pump in aluminium!

Comes with 2 clips.

Works with all valves.

### FACTS

Length: 180 mm  
 Diameter: 30 mm  
 Weight: 64grams  
 Capacity: 95 cm<sup>3</sup>/stroke  
 Maximum pressure: 5 bars/PSI 70

Powerful air with Quicker Floor!

## QUICKER FLOOR Art.nr 116660050

Purchasing Quicker Floor pump you'll get both high pressure and large volume for a very reasonable price!

The barrel is a light weight double walled aluminium design. Handle as well as the base are made of nylon fibre glass combination in order to ensure long-lasting usage in any type of climate.

The pressure gauge which indicates both psi/bar is cleverly placed as high up as possible on the pump for easy reading. Manometer can be preset.

Valve lock control enables you to conveniently leak air in case you should have pumped too much air in the tyre. The appropriate valve can very quickly be selected by the side by side connection on the valve head.

### FACTS

Length: 620 mm  
 Diameter: 38 mm  
 Weight: 1320 grams  
 Capacity: 1258 cm<sup>3</sup>/stroke  
 Maximum pressure: 11 bars/154 PSI.

## QUICKER FLOOR LITE Art.nr 116660055

Purchasing Quicker Floor pump you'll get a good pressure and large volume for a very reasonable price!

The barrel is a light weight steel/aluminium design. Handle as well as the base are made of durable polymers in order to ensure long-lasting usage.

The pressure gauge which indicates both psi/bar is placed at the lower part of the pump. The red arrow on the manometer can be preset, so it will be very easy to see when you have reached the desired pressure.

The appropriate valve can very quickly be

selected by the side by side connection on the valve head.

A high quality floor pump with a double head for all valves.  
Alu/steel/polymer

Pressure gauge  
Pressure: 6-7 bar
